EDUCATION

Bachelor of Science in Information Technology

ACES Tagum College Inc.
Institute of Information and Communications Technology (IICT)

4th Year Student

Senior High School

Tagum City National
Comprehensive High School
2018-2019

TECHNICAL SKILLS

Programming

Java • Python • JavaScript • Dart

Web

HTML • CSS • JavaScript

Mobile

Flutter / Dart

Database

MySQL • phpMyAdmin • Firestore

Firebase

Authentication • Firestore

Tools

VS Code • Android Studio

Version Control

Git • GitHub

Machine Learning

CNN • Image Classification

IoT

ESP32 • Sensor Development

PERSONAL SKILLS

Problem Solving • Teamwork • Communication • Time Management • Adaptability • Willingness to Learn • Attention to Detail • Troubleshooting

PROFILE

Motivated and hardworking BSIT student with hands-on experience in software development, web and mobile applications, database management, machine learning, and IoT projects. Eager to gain practical experience, strengthen technical skills, and contribute to meaningful technology projects.

PROJECTS

Attendify

Student Attendance & Event Management System

FLUTTER • FIREBASE

- Developed a mobile application for managing students, events, and attendees.
- Integrated Firebase Authentication and Cloud Firestore.
- Implemented event creation, attendee tracking, and PDF report generation.

QualiMeat

Meat Freshness Classification System

PYTHON • TENSORFLOW • EFFICIENTNETB0 • TFLITE

- Developed a CNN-based image classification system for meat freshness.
- Prepared datasets for training, validation, and testing.
- Worked with EfficientNetB0 and TensorFlow Lite for deployment.

StockMaster

Inventory & Point-of-Sale System

HTML • CSS • JAVASCRIPT

- Developed and improved web interfaces for inventory and POS workflows.
- Worked with frontend components and database-related features.

EZ Mart

Retail Management System

SQL • DATABASE DESIGN

- Designed a retail system for products, inventory, and sales.
- Worked on normalization, ERD development, and SQL.

ACADEMIC EXPERIENCE

- Developed multiple software and IT projects as part of academic coursework.
- Collaborated with classmates on system development, documentation, presentations, and testing.
- Applied programming, database management, UI/UX, troubleshooting, and system development skills.
